Project Manager, Savant Services Corp.

Session Speakers:

[Vin Crosbie](#)

Managing Partner, Digital Deliverance LLC

[Shannon Maher](#)

AOL TW

[Albert Chu](#)

VP of Business Development, PalmSource, Inc.

The world economy has been dominated by networks that facilitate the movement of goods and services. Digital lines, fiber optics, automated switching, satellite relays, and computer access ports have made the telecom network the most versatile communication network on earth. The telephone system has a massive installed base of over one billion access points that carry voice, music, images, video, and alphanumeric data.

Mr. Paul Ziek
Project Manager
Savant Services Corp.

Participating in the following:

Tuesday, 9/9/2003 - 8:30am–10:00am

[The Wireless World](#)

Paul is a project manager for Savant Services Corporation, a New York-based project management and advisory firm. He has executed numerous relocations, retrofits, and build-outs. His experience ranges from printing plant design and construction to technology upgrades. Paul holds a M.A. from New York University, a B.A. from Rutgers University and is a certified Project Management Professional.
